

Billy Smoker

OPEN FIRE COOKERS

It is no new philosophy that cooking brings people together. Across time, across cultures, bringing family and friends together involves – perhaps requires – food. Favourite family dishes become famous family dishes, replicated and re-imagined for generations to enjoy.

The fundamental element – fire!

While new ways of cooking have and will be engineered, fire offers more. Fire is primal, has supported our very existence like nothing else and offers a genuine charm, warmth and romance.

As wood crackles in our ears we find ourselves mesmerised by the flame and smokey aroma foreshadowing the good food to come; Our senses are fully engaged with this natural phenomenon. We have been perfecting the art of cooking on flame for aeons, however our own generation seems to be losing this knowledge, opting for convenience over substance. We believe in bringing food back to it's roots. It is there you will find flavours and textures unachievable by other means.

BILLY SMOKER

Born from the campfire, our mission is to create an authentic Australian wood cooking experience. Our multicultural nation celebrates techniques passed down through generations, honing their craft, while gazing into the flame.

Cooking, heating and entertaining with Billy Smoker is uncomplicated, modern and accessible. Standing strong and minimalistic allowing the theatrics of the flames to create an experience not soon forgotten.

PLANT | GROW | PROSPER

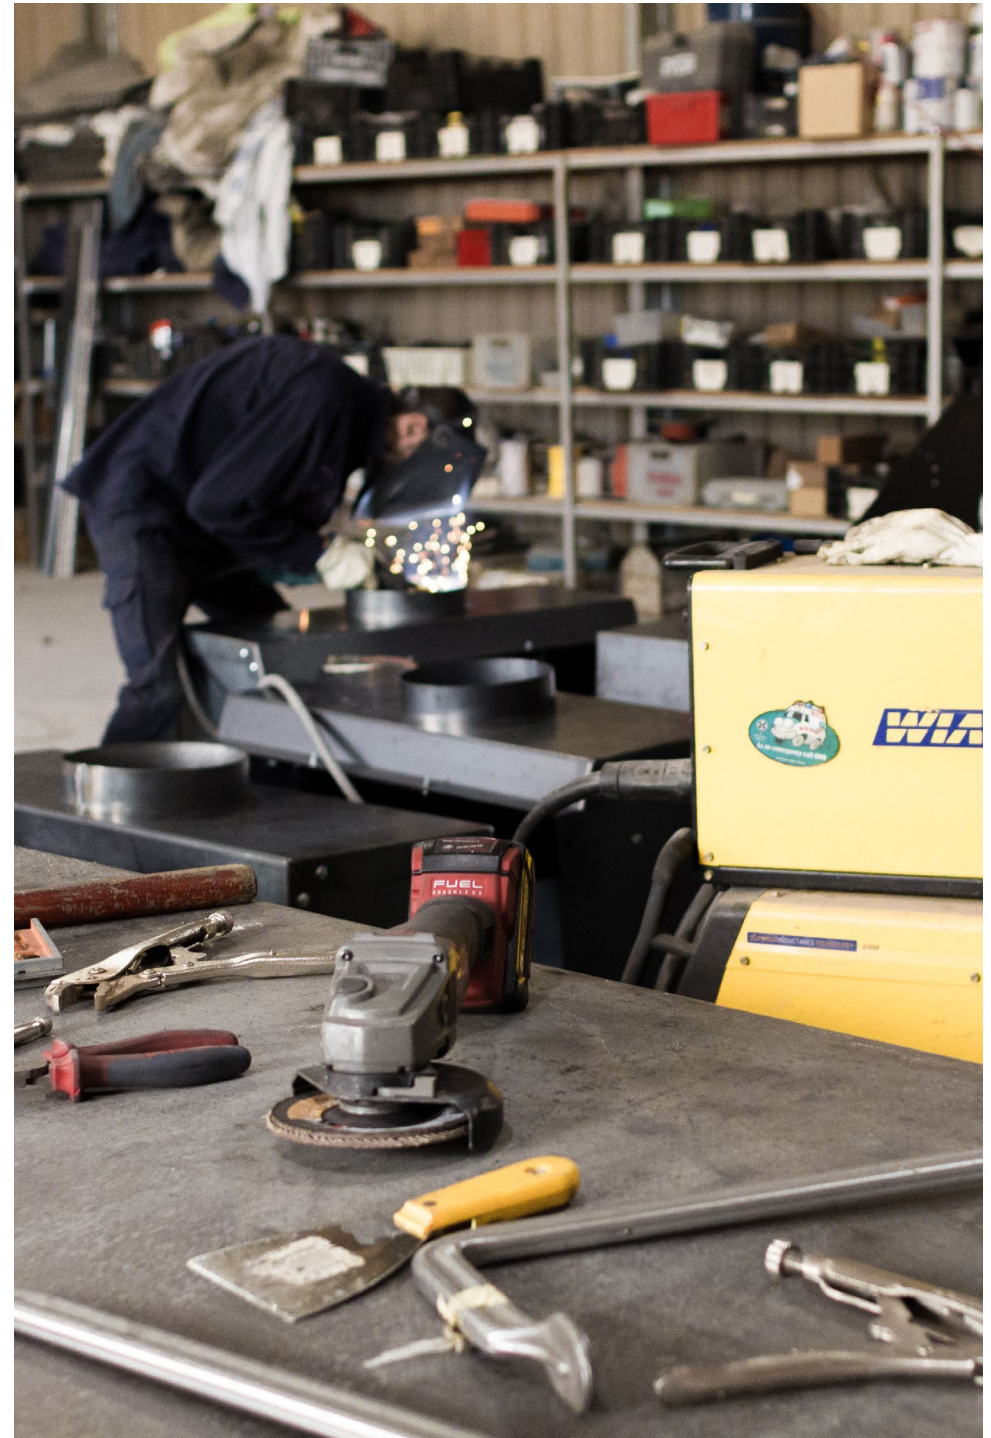

We develop Australian brands and multicultural cooking products to encourage outdoor living with friends and family in style. Our smart design principles enable sustainable manufacture within Australia, building and supporting local industry.

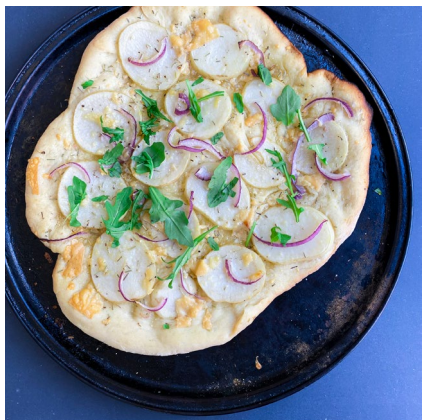

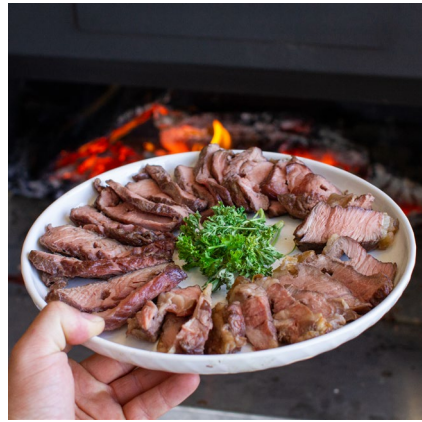

The PGP team offers an extensive range of product design & engineering services; from ideation to commercialisation. We utilise knowledge and manufacturing skills from multiple industries to plant and grow ideas into viable products which help communities prosper. PGP draws upon over 25 years of combined product development experience to deliver quality Australian made products.

AUSTRALIAN MANUFACTURING

Billy Smoker is owned and made in Australia. Many local families are involved through the lifecycle of the products; research, development, design, engineering, machining, fabrication, blasting, painting, integration, assembly, marketing, sales, distribution, logistics, installation and customer support. One of PGP's core goals is to help build a sustainable manufacturing ecosystem which fosters world leading product development whilst delivering long term value to Australian communities.

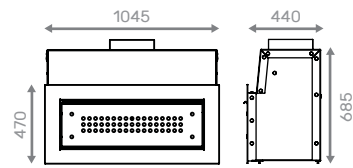

OPEN FIRE COOKERS

The Open Fire Cookers stay true to our philosophy of bringing people together around fire and food. Designed to suit both indoor and outdoor living spaces, certain to create an impressive and memorable atmosphere. Clean and minimal form with elegantly designed componentry, they come in three variants for different settings and install environments. For installation instructions and specifications please download our manuals.

GENERAL FEATURES

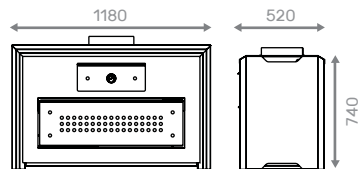

- Pizza Oven - Fits a 13 inch pizza and comes with a high temperature pizza stone for hot and fast wood oven pizzas
- Baking Oven - A thermometer allows for monitoring the oven to bake at various temperatures
- Smoking - The ventilated upper wood oven creates an easy-to-use low and slow smoking environment with adjustable smoke flow
- Grilling - Flame grill in style with ample room to control and push coals around
- Removable Door - Keep on to retain maximum heat, smoke and sparks inside the unit or remove after cooking for full view of the fire
- Panoramic Fire - Enjoy the wide angle view of the fire

ARTIST

Designed for high-end interior and exterior architectural installations – the Artist is the open fireplace, with the cleanest aesthetic currently on the market. Equipped with Billy Smoker's proprietary Hotbox oven, the Artist is a sleek entrant to the wood heating and cooking products league.

- Type: Inbuilt open fireplace
- Heat Capacity: Up to 125 m²
- Heat Mode: Radiant
- Firebox: 100W x 30D x 38H cm
- Material: 3-6 mm steel
- Finish: Metallic black paint
- Oven Vol: 29 ltr
- Oven: 36W x 43D x 18H cm
- Open Coal Vol: 136 ltr
- Max Log: 22Ø x 85L cm
- Baffles & Doors: Steel
- Heat Banks: Ceramic plate
- Spigot: Fully welded

CHEF

Designed to enhance any space – the Chef encapsulates the Artist's clean lines and provides a versatile wood cooking experience. From cooking pizzas in three minutes and nursing delicate pavlovas, to low and slow smoking and grilling over coals, this product inspires the Chef within.

- Type: Inbuilt open fireplace
- Heat Capacity: Up to 125 m²
- Heat Mode: Radiant
- Temp Control: Thermometer
- Firebox: 100W x 30D x 38H cm
- Material: 3-6 mm steel
- Finish: Metallic black paint
- Oven Vol: 29 ltr
- Oven: 36W x 43D x 18H cm
- Open Coal Vol: 136 ltr
- Max Log: 22Ø x 85L cm
- Baffles & Doors: Steel
- Heat Banks: Ceramic plate
- Spigot: Fully welded

COMPOSER

Designed to be integrated with plinths - the Composer has the same cooking functionality and heat output as the Entertainer, but offers an elegant pose for low profile installations. As a modern interior icon in the making, the Composer is sure to please.

- Type: Free standing open fireplace
- Heat Capacity: Up to 150 m²
- Heat Mode: Radiant & convective
- Temp Control: Thermometer
- Firebox: 100W x 30D x 38H cm
- Material: 3-6 mm steel
- Finish: Metallic black paint
- Oven Vol: 29 ltr
- Oven: 36W x 43D x 18H cm
- Open Coal Vol: 136 ltr
- Max Log: 22Ø x 85L cm
- Baffles & Doors: Steel
- Heat Banks: Ceramic plate
- Spigot: Fully welded

ENTERTAINER

Designed to maximise heat output – the Entertainer has all the cooking functionality of the Chef and is easy to install. For those who preference ergonomics, the Entertainer has legs to provide the ideal cooking height without the need for a plinth or stand.

- Type: Free standing open fireplace
- Heat Capacity: Up to 150 m²
- Heat Mode: Radiant & convective
- Temp Control: Thermometer
- Firebox: 100W x 30D x 38H cm
- Material: 3-6 mm steel
- Finish: Metallic black paint
- Oven Vol: 29 ltr
- Oven: 36W x 43D x 18H cm
- Open Coal Vol: 136 ltr
- Max Log: 22Ø x 85L cm
- Baffles & Doors: Steel
- Heat Banks: Ceramic plate
- Spigot: Fully welded

ACCESSORIES

Our Open Fire Cooker accessories are continuously growing and are intended to enhance the Billy Smoker experience. We have accessories to increase cooking capacity and for alternative modes, as well as those to simplify the installation process. Our installation accessories take the guess work / ambiguity out of the process, leaving only elegance and confidence.

Billy Smoker is experiencing rapid portfolio growth, so be sure to check in with our website or trained distributors to see the most up to date products.

SLIMSPIT

Slimspit is Billy Smoker's rendition of a wood fired rotisserie. Consistent with the brand, this product tastefully balances entertaining and heating functionality.

Designed to be used on all Open Fire Cookers, Slimspit doubles as an interactive centrepiece which can easily detach and be used as a gourmet serving tray. Slimspit operates differently to traditional spits as the heat source is located horizontally to the cooking zone. This unique design makes it possible to have a rotisserie without compromising heat output or impeding flame visuals. Packed with features, Slimspit provides an enjoyable cooking experience and loves to be the centre stage of parties!

Features:

- 100% stainless steel construction
- Hotter than traditional charcoal rotisseries
- Engineered to disperse heat for safe handling
- Inbuilt rail levelling system to cater for all installs
- Full length, fully welded drip tray for clean cooking
- Removable tray doubles as serving centrepiece

Usability:

- Rail system enables instant temperature adjustment
- Slide range provides great accessibility for refuelling
- Easy to clean drip tray and rails
- Disassembles for storage

Integration:

- Suitable for indoor cooking
- Enhances functionality of Open Fire Cookers
- Intelligent hooking system enables rapid installation
- Accommodates most standard rotisserie motors

Accessories Include:

- 1 x 240V AC electric turns up to 5kg loads
- 1 x rotisserie shaft
- 2 x mounting bracket
- 2 x pronged fork

HOTBOX

The Hotbox is an additional insert for Open Fire Cookers which provides more cooking space in the base of the unit.

- 100% stainless steel
- Dual rack positions
- Fits inside Open Fire Cooker on internal shelf above coals
- Operational in conjunction with external Open Fire Cooker door
- Adjustable position to fire
- Comes with single tray & rack

ENCLOSURE SHIELDING SYSTEM

The Enclosure Shielding System is designed to be used with an inbuilt installation of our Open Fire Cookers where shielding from combustibles is required to be compliant with AS2918 - the Australian Standard for safe installations.

The Enclosure Shielding System needs to fit inside a cavity that has an extra 100mm of clearance to any combustibles. This clearance can be composed of non-combustible building materials or air gaps.

- Meets Australian Standards
- Easy assembly & installation
- No modifications are required to the Open Fire Cooker for this accessory.
- Specifically design to suit each model

HANG

Hang provides a neat place to hang the door when cleaning your Open Fire Cooker or while it is not in use.

- 100% stainless steel
- Can be fixed to various building materials
- Can be used in multiple orientations as desired
- Easy to install

FLOAT

Float is our artistic interpretation of a wood storage system for the home. The design can be assembled in three uniquely different configurations. Choose how you want to store and display wood for the Billy based on your space and taste.

Float is made from 4mm steel and powder coated in ripple black for a tough durable finish. It comes with all the fixings required including our signature Billy bolts which make it clean and visually pop.

- Three unique configurations
- Tough durable texture
- 4mm mild steel
- Includes all fixings for assembly
- Black ripple powder coat finish
